

HR ANALYTICS DASHBOARD

Workforce Insights & Employee Attrition Analysis using Power BI

Data-Driven Insights

Interactive Dashboards

KPI Reporting

Better Decision Making

KEY METRICS

Total Employees
1,417

Active Employees
1,186

Attrition Count
231

Attrition Rate
16.3%

Average Age
36.94

Average Experience
7.04

KEY INSIGHTS

01

ATTRITION OVERVIEW

Overall employee attrition rate is 16.3%.

This indicates moderate workforce turnover requiring retention strategies.

02

DEPARTMENT INSIGHTS

Sales department shows the highest attrition.

Workload pressure, targets, and job role demands may be key factors.

03

SALARY INSIGHTS

Lower salary slabs (0-3 LPA & 3-6 LPA) have higher attrition trends.

Compensation appears to be a major factor in retention.

04

EXPERIENCE INSIGHTS

Employees with lower experience levels show higher attrition.

Early-career employees may need more support, growth & engagement.

05

WORKFORCE DISTRIBUTION

Majority workforce belongs to 26-35 age group.

This is the core productive segment of the organization.

STRATEGIC RECOMMENDATIONS

FOCUS ON RETENTION

Implement targeted retention programs in Sales and high attrition departments.

REVIEW COMPENSATION

Reassess salary structures for lower slabs to improve employee retention.

IMPROVE ENGAGEMENT

Enhance employee engagement through recognition, feedback & career development.

SUPPORT EARLY CAREER EMPLOYEES

Provide mentorship, training & growth opportunities.

DATA-DRIVEN HR

Use HR analytics regularly to monitor trends & make proactive decisions.

OPTIMIZE WORKFORCE

Use insights to plan workforce, optimize hiring & improve overall productivity.

CONCLUSION

- ✓ The HR Analytics Dashboard successfully transformed raw workforce data into meaningful business insights using Power BI.
- ✓ The analysis identified employee attrition trends, workforce distribution patterns, salary-based turnover behavior, and department-wise performance indicators.
- ✓ Through interactive dashboards, KPI reporting, and visual analytics, the project demonstrates how HR analytics can support employee retention strategies, workforce optimization, and data-driven organizational decision-making.
